

# ***Food-Food***

---

*Your personalised Recipe Book iOS*

- **Rajashree Naik**

# Overview

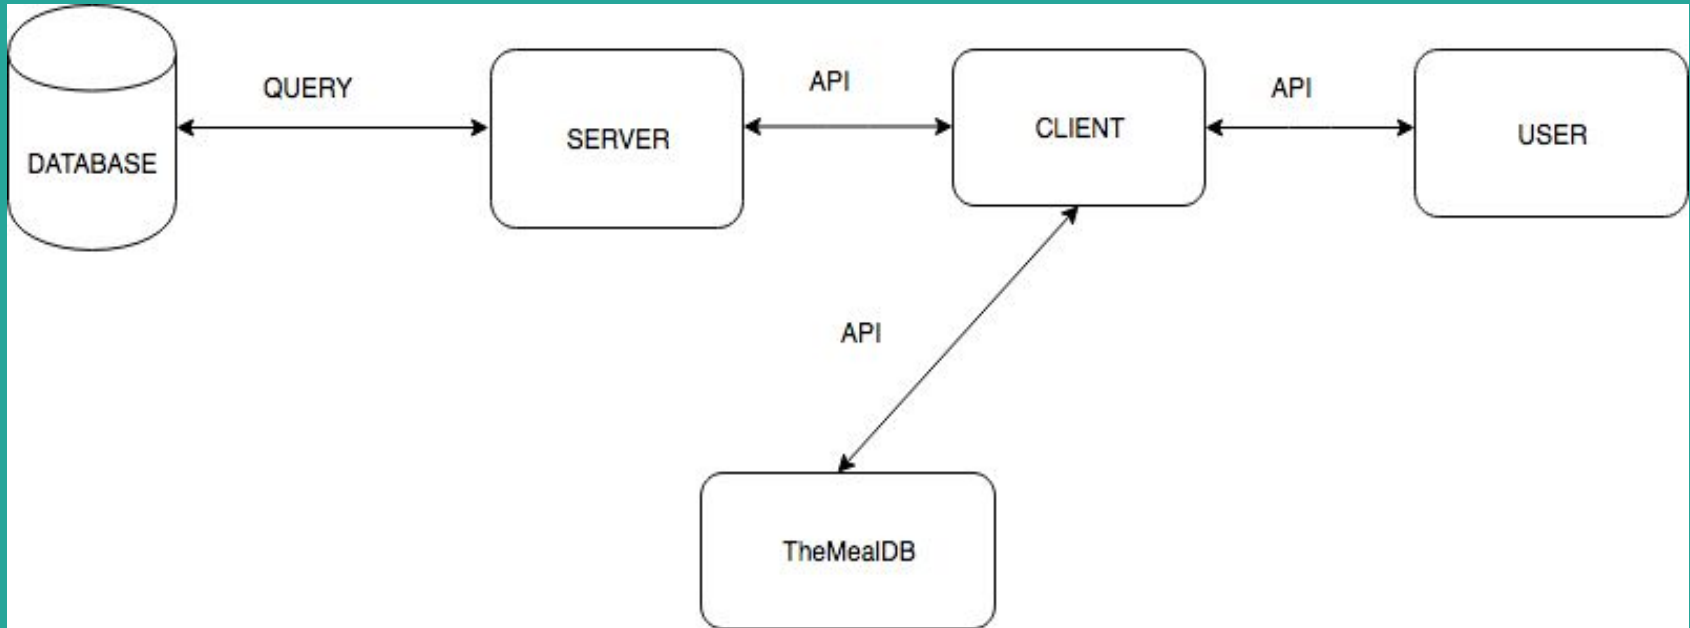

*The project is Food-Recipe App will be build from Open APIs - "THE MEAL DB"*

*Users will be able to sign-up and login and will be able to save and delete recipes from their save tab, this will ease their way of cooking.*

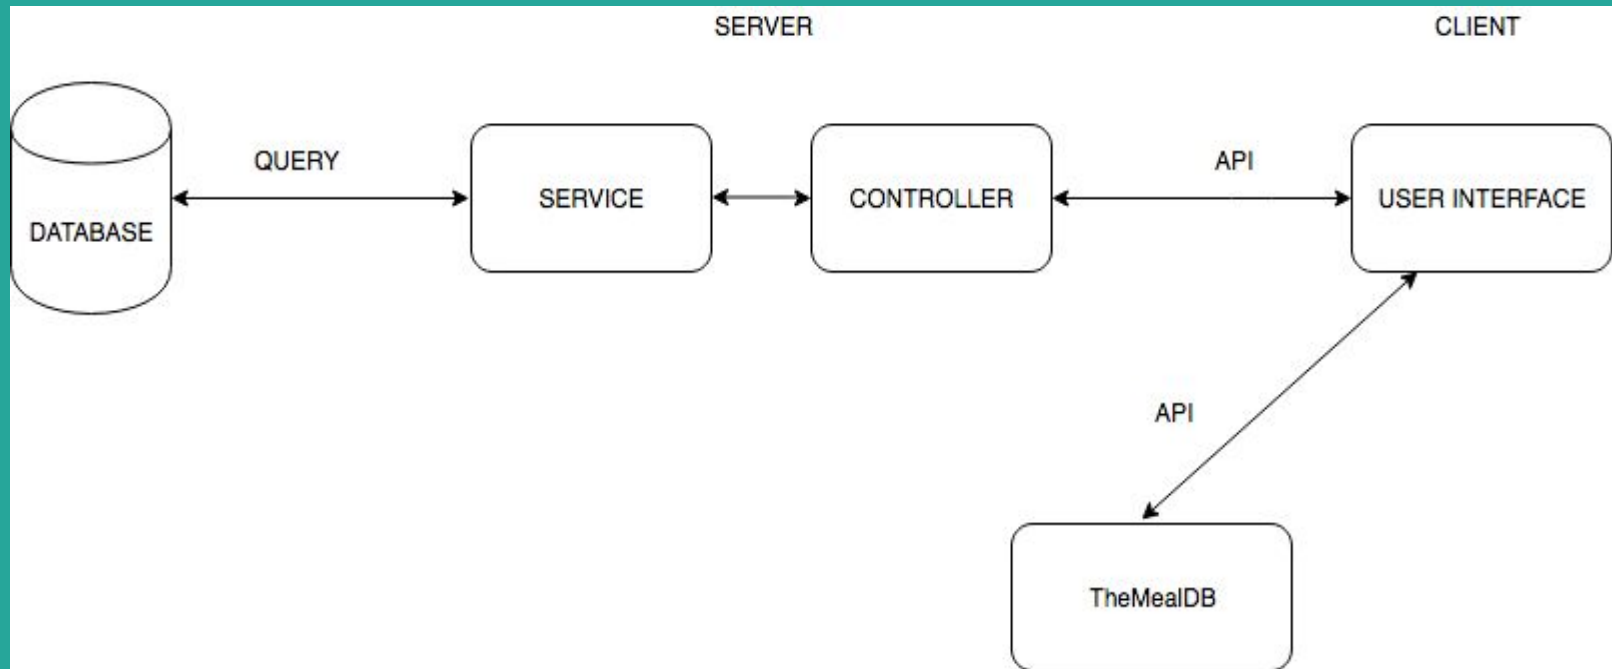

*The App includes different categories of Recipes which are displayed and pulled directly from an Open-API*

*The backend used is "FireBase" to store the data of the users as well as the APIs.*
